

## JUSTIFICATION OF USE OF EMISSION TEST RESULTS FOR DIFFERENT NOTIFICATIONS

Referring to the notification of the products containing the same composition but differentiated strength because of the nicotine's content, the company Gold Steam Garden SRL used for those notifications the results of emission test performed for the highest content of the nicotine. Such an approach have been chosen as the manufacturing company relies on the production options based on the risk basis. Additionally, providing for the manufacturing standard procedures and a quality of the components it is expected that emissions can justifiably be similar or relatively to the nicotine content.
